

Licensed To Restore

Top **007th**
Generation
BONDING AGENT
in 2008

Tokuyama now carries a
“License to Restore” by combining
Estelite® Sigma and Bond Force.

Now there’s a way to give patients extraordinary strength and beauty with less time in the office. Estelite® Sigma, a universal resin composite, offers superior esthetics for anterior restorations as well as the strength required for posterior restorations. It provides exceptional handling and sculptability for the clinician. Bond Force is the ideal partner for Estelite® Sigma. Bond Force gives the same reliability expected with total-etch systems with the simplicity of one bottle, less technique sensitivity, no etching and no mixing.

Estelite® Sigma and Bond Force -
Great as a team or
independent.
